Spilletid: 1t 20 min

CAN YOU REWIRE THE BRAIN  
JUST BY TAKING A BREATH?

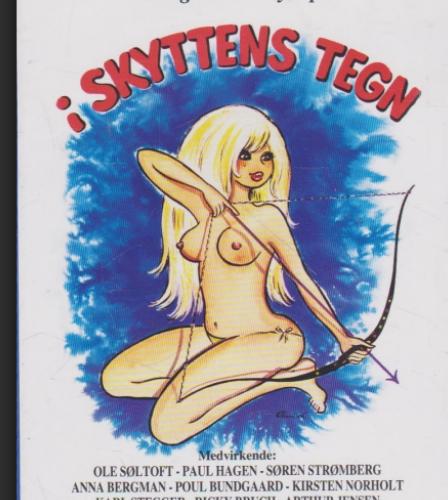

"Grips your heart from the first moment."  
— Film Comment

"Artistically crafted. Riveting. Engrossing."  
— Filmmaker Magazine

"My main interest is promoting ethics without teaching religion. Ethics are universal values. We must find a way to promote the basic human values in a secular way without mentioning religion. In order to understand this, the scientific findings are very convincing and Richard's work is very helpful in this field. Sometimes I call him Guru of Science!"  
— His Holiness the Dalai Lama

## Plot

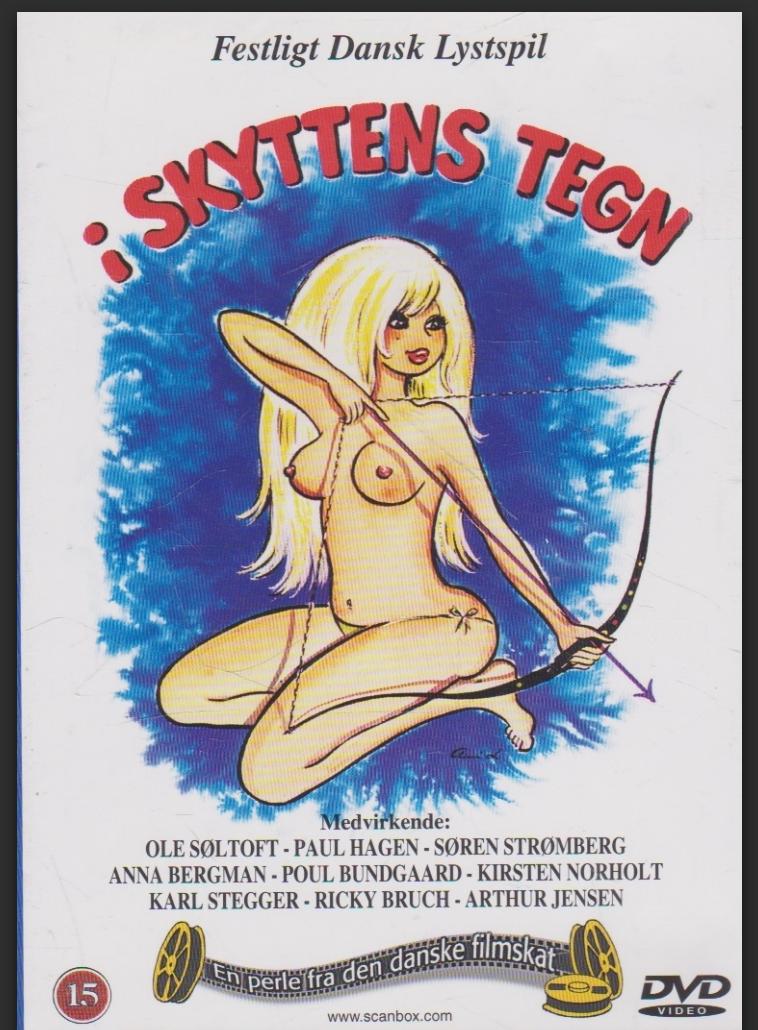

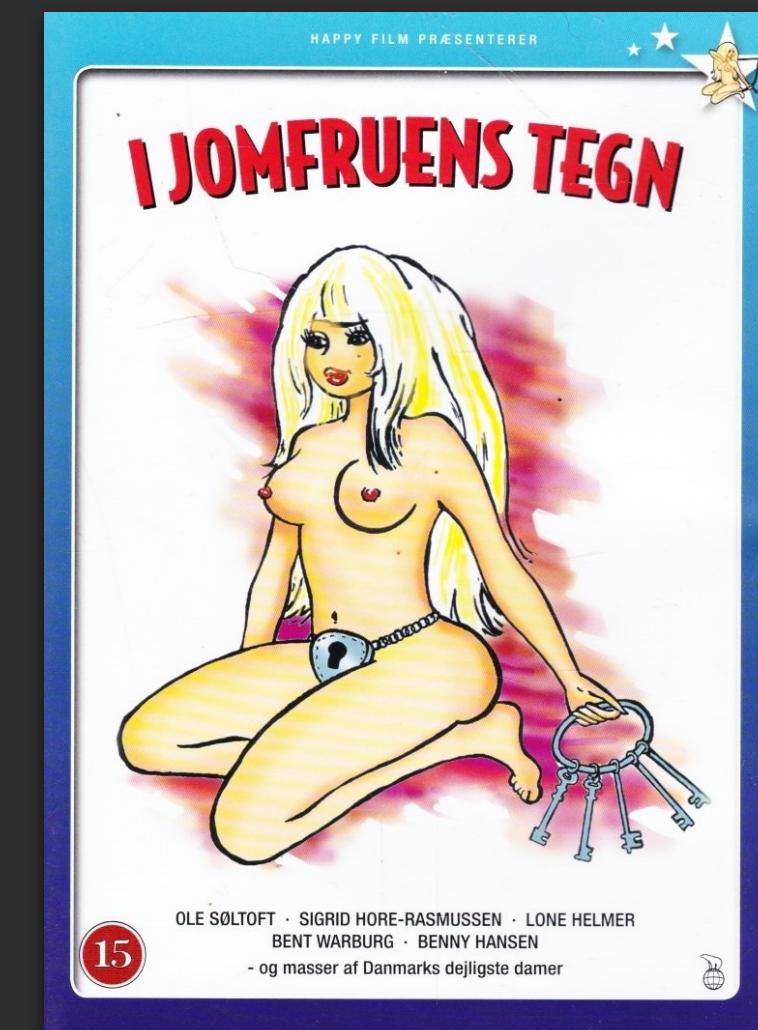

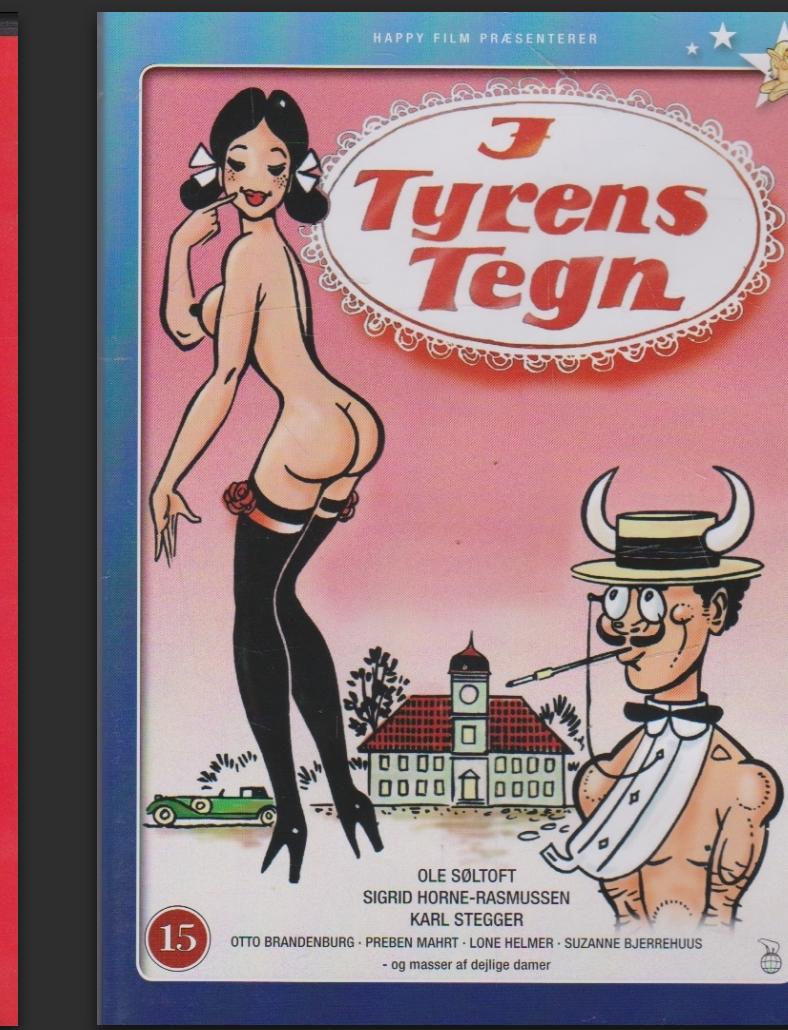

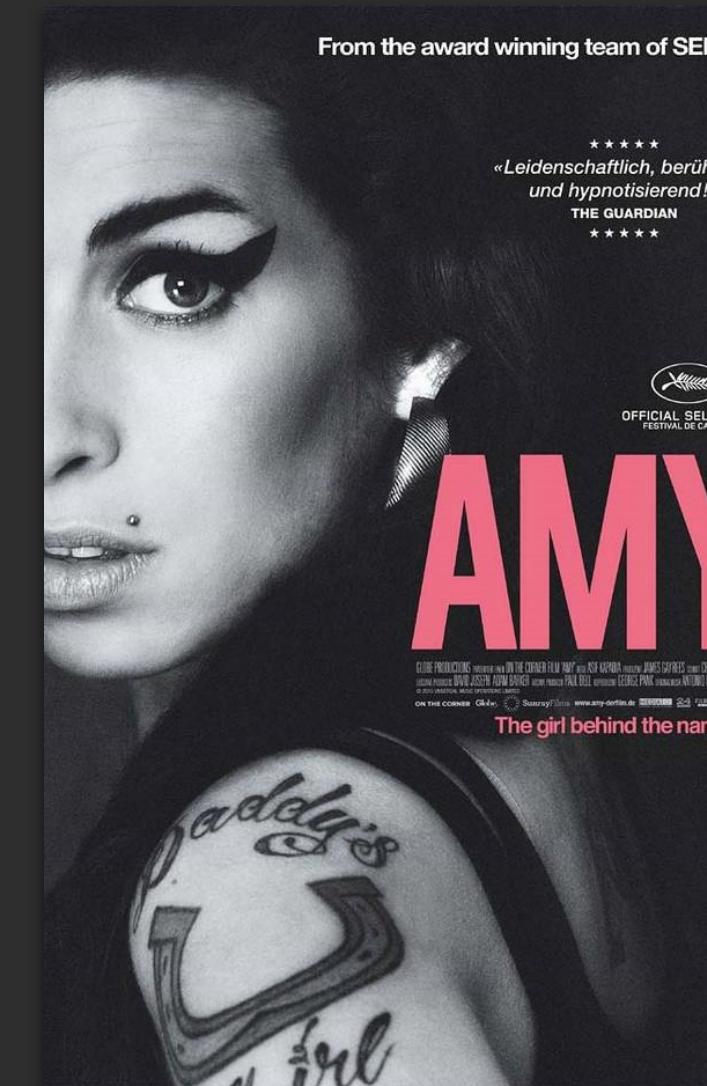

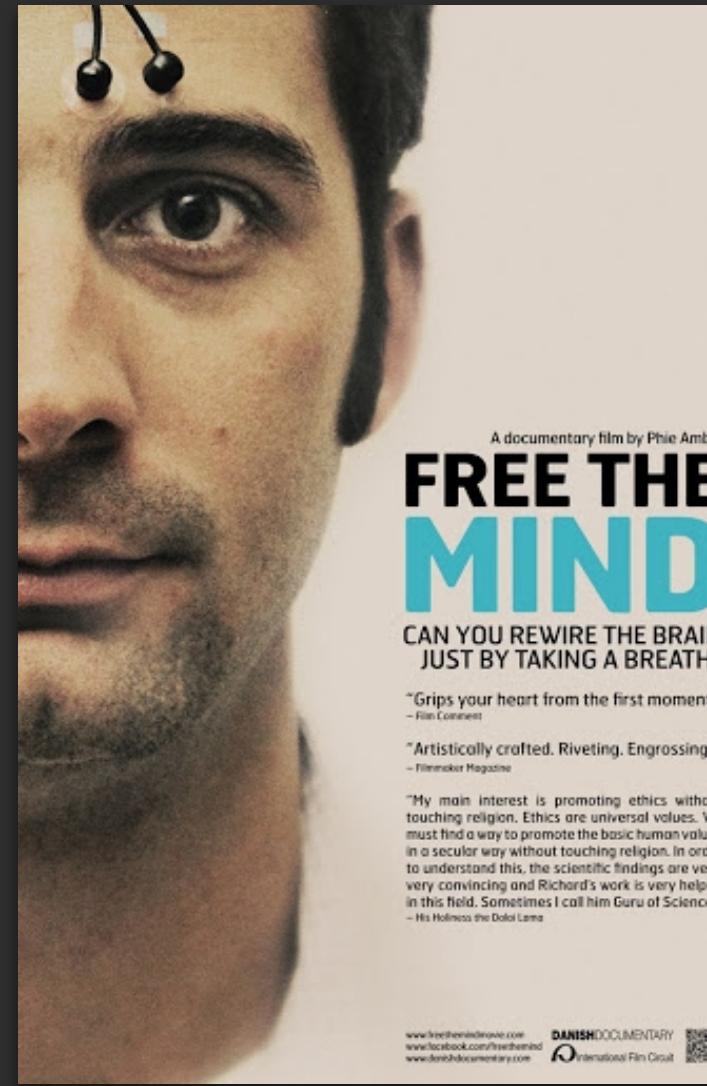

Free the Mind er fortællingen om, hvordan én mands vision vender tre personers skæbne - ikke blot med vidtrækkende perspektiver for dem, men også for menneskeheden i fremtiden. Professor Richard Davidson er en af verdens førende hjerneforskere. Han har sat sig for at undersøge hvordan man fysisk kan ændre menneskets hjerne - kun ved tankens kraft. Steve og Rich er to af USAs tusindvis af krigsveteraner. Deres liv er vendt til smertelige mareridt: De er plaget af angst for at være sammen med andre mennesker, kan ikke sove uden medicin og lider af skyldfølelser over det de så og gjorde ved andre mennesker under krigen. Will på 5 år har ADHD og kraftige angstafald. Hans forældre vil gerne forsøge andre metoder end traditionel medicinering. Kan Professor Richard Davidson gøre en forskel? Kan han redde dem ud af deres miserable tilværelse og hjælpe dem til et normalt liv? "Free the Mind" følger de tre forsøgspersoner på deres modige rejse ind i sig selv.
